CONTACT-FREE**

Arkad Soft, the design and rectification software for every kind of foot orthosis

A comprehensive, intuitive, and easy-to-use software.

Using a standard template or the imported patient scan, follow the different design stages step by step, compatible with your typical working routines.

This solution offers all options in one place: flexible, rigid, 3D printed or milled orthotics.

Save time so you can focus on your patients.

Your patient's data is secure

Arkad Soft is Windows based

Thanks to the digital work, I never start from scratch when renewing my foot orthoses.

V.R. (podiatrist)

Since using the Arkad solution, I can see 12 more patients per week.

L.S. (orthopedic technician)

Arkad Printer P1

The 3D multi-density printer

From the 3D (software) to the real world (printer) in a few seconds.

Keep your expertise safe at your office thanks to the secure file transfer between the devices and software.

Continuous printing of your foot orthoses pairs without human interaction.

- Plug & Play technology
- Minimalist and compact device (h: 1 m)
- Silent
- No waste

Create your custom fabrication site. Increase your production capacity with more printers!

3D multi-density printing

Real-time follow-up of all the printing stages from your touchscreen.

Ready-to-use finished product, foot orthoses ready to be delivered to your patient.

Up to 10 pairs of orthotics per day
and more than 100 pairs without human interaction

An expert by your side throughout the whole process

RODIN EDUCATION **TRAINING**

One training course for a single professional tool. Schedule your online training session on Arkad usage with our specialized team and **you will become autonomous in just 3 hours!**

TECHNICAL **SUPPORT**

Our team is available via email and phone to answer all your questions and solve any problem remotely.

- **Online Help tutorials available**
- **FAQ on the website**
- **Documentation downloads**

Beyond a **shared passion**
